Summary

- Software Engineering graduate (FAST-NUCES, 2026) specializing in **full-stack AI development** and **Machine Learning** - building production-grade platforms that integrate Large Language Models (LLMs), Artificial Intelligence (AI) agents, and real-time pipelines into deployed web applications.
- Proficient in **React.js, FastAPI, Node.js, and Python**; experienced across the full Software Development Life Cycle (SDLC) from API design and AI integration through to CI/CD and cloud deployment.

Technical Skills

Full Stack (Expert): React.js, Node.js, FastAPI, Express.js, MongoDB, PostgreSQL, RESTful APIs (REST), Socket.io, JWT Authentication, Tailwind CSS

AI/LLM Integration (Expert): OpenAI API, Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), Large Language Models (LLM), Agentic AI, ElevenLabs TTS, Deepgram STT, HuggingFace Transformers, MediaPipe, LangChain

DevOps & Cloud (Proficient): Docker, GitHub Actions, AWS (EC2, S3), Redis, CI/CD (Continuous Integration/Continuous Deployment), Swagger UI, Jest, Supertest

Languages: Python, JavaScript, TypeScript, C++, SQL **Tools:** Git, Postman, VS Code, PyCharm, Agile/Scrum

Education

FAST National University of Computer and Emerging Sciences (NUCES) 2022 - Jun 2026
Bachelor of Science in Software Engineering *Faisalabad, Pakistan*

Punjab Group of Colleges 2019 - 2021
Pre-Engineering (FSc) *Punjab, Pakistan*

Projects

- AI Voice Call Center Platform** | *React, FastAPI, Twilio, ElevenLabs, OpenAI, Deepgram, PostgreSQL* live
- Full-stack SaaS call center with a 12-page React/Vite dashboard (AuthContext-protected routes); engineered a real-time voice pipeline - Twilio + Deepgram STT + ElevenLabs TTS + OpenAI LLM - targeting **sub-2s latency** with GoHighLevel CRM sync and Stripe subscriptions. Deployed live for a UK-based client (CallEase) serving dental and restaurant businesses, with a multi-tier dashboard for three subscriber account types.
- BrandTide - AI Sentiment Analysis** | *FastAPI, React, MongoDB, HuggingFace, Gemini* FYP | live
- Fine-tuned RoBERTa on Roman Urdu/English reviews achieving **98% accuracy**; FastAPI backend with 12+ endpoints, Gemini AI Agent for natural-language MongoDB queries, and **80+ automated tests** (pytest, Vitest, Supertest) with SonarQube quality gate via Docker.
- Vendor Price-Drift Agent** | *n8n, Google Gemini, SerpApi, Google Sheets, Slack* n8n workflow
- AI agent workflow that parses supplier price lists (Gmail-triggered PDF/XLSX ingestion) and diffs each line item against a Google Sheets price-history log; past an 8% threshold, a Gemini-powered agent with SerpApi sources 2-3 alternate suppliers, with trend analysis, structured output parsing, and a Slack human-in-the-loop approval gate before any alert is sent.
- FitCoach AI - Real-Time Exercise Coach** | *React, TypeScript, MediaPipe, ElevenLabs, OpenAI, Node.js* live
- Real-time webcam pose detection via MediaPipe PoseLandmarker (GPU delegate, **33 landmarks**) with biomechanical angle analysis for squats and push-ups; ElevenLabs TTS with word-level lip sync on a Ready Player Me 3D avatar and OpenAI coaching with 10s throttle.
- B2B Research & Outreach Agent** | *Node.js, Express, JWT, Gemini, Chroma, Next.js* live
- Multi-tenant, multi-agent RAG platform automating lead research and personalized outreach; built a Node.js/Express backend with JWT-derived tenant scoping enforced at the repository layer and an **automated cross-tenant isolation test suite**; architected the agent pipeline (Research → RAG → Drafting → Review Gate → Send → Tracking) with Gemini embeddings and per-tenant Chroma vector namespaces.

Experience

- Freelance Full-Stack Developer** Jul 2025 - Oct 2025
Direct Client *Remote*
- Built an emotion-detection simulator | *live*: users complete tasks and converse with AI on any topic while it detects and analyzes their emotions, using OpenAI, ElevenLabs, Hume AI, and Whisper.
 - Built a grief-support companion app | *live* letting users share grief and console one another via community chat, shared prayers, and candle-lighting, using Flutter and Firebase.
 - Built a real-time AI talking avatar | *live* that communicates via voice or text with viseme-driven lip sync, using OpenAI and ElevenLabs.
 - Delivered the AI Voice Call Center Platform | *live* (see Projects) to a UK-based client: agentic inbound/outbound calling for dental and restaurant businesses with a multi-tier dashboard for three subscriber types, using Twilio, ElevenLabs, and OpenAI.
- Full Stack Web Developer** Jun 2025 - Aug 2025
Vexed Solutions (Internship) *Multan, Punjab, Pakistan · On-site*
- Built and deployed full-stack web applications using MongoDB, Express.js, React.js, and Node.js; contributed to REST API design, CI/CD pipeline configuration, and responsive frontend integration.
