Summary

DevOps and Cloud Engineer who has deployed production-grade AWS architectures - three-tier apps, Multi-AZ RDS, Auto Scaling, and Blue-Green pipelines - while completing a Software Engineering degree at FAST-NUCES (2026). Hands-on across the full DevOps stack: **Terraform IaC, Docker, Kubernetes, and Jenkins CI/CD**. Also achieved **98% accuracy** on an NLP/AI final-year project, demonstrating depth beyond infrastructure.

Technical Skills

Cloud – AWS (Expert): EC2, VPC, IAM, RDS (Multi-AZ, Read Replica), S3, CloudFront, ALB, Auto Scaling, CloudWatch, ECR, CloudFormation, NAT Gateway, Security Groups

DevOps & CI/CD (Expert): Docker, Kubernetes (Deployments, PV/PVC, HPA), Terraform, Jenkins (Declarative Pipelines, Groovy Shared Libraries, Blue-Green), GitHub Actions, SonarQube, Trivy, Prometheus, Grafana, Nginx

AI/ML & Web (Proficient): Python, LangChain, HuggingFace Transformers, RAG Pipelines, React.js, Node.js, Next.js, MongoDB, REST APIs

Languages: Python, JavaScript, HCL, Groovy, Dart, C++

Tools: Git, GitHub, VS Code, Streamlit

Education

FAST National University of Computer and Emerging Sciences (NUCES)

Bachelor of Science in Software Engineering

2022 – Jun 2026

Faisalabad, Pakistan

Punjab Group of Colleges

Pre-Engineering (FSc)

2019 – 2021

Punjab, Pakistan

Projects

Multilingual Sentiment Analysis System | *Python, Transformers, NLP, Streamlit, CI/CD*

Final Year Project

- Transformer-based model classifying English, Roman Urdu, and Urdu text; achieved **98% accuracy** and **96% F1-Score**; deployed via automated CI/CD pipeline.

CI/CD Platform: Jenkins, Terraform & Blue-Green Deployment | *Jenkins, Groovy, Terraform, Docker, SonarQube*

- Provisioned full AWS infrastructure (VPC, EC2, ALB, ASG, S3, DynamoDB) **entirely via Terraform**; authored declarative Jenkinsfile with parallel stages and a reusable **Groovy shared library**.
- Integrated **SonarQube** quality gate (Coverage $\geq 70\%$) and **Trivy** scanning; implemented Blue-Green deployment with smoke-test-gated traffic switching; monitored via **Prometheus/Grafana**.

Highly Available WordPress on AWS | *EC2, ALB, Auto Scaling, RDS MySQL, CloudFront, S3, IAM*

- Designed a **Multi-AZ VPC** with public/private subnets; deployed WordPress behind an ALB with Auto Scaling Group (min 2, max 3); configured **CloudFront CDN** with four cache behaviors and an **RDS MySQL read replica**.

Three-Tier Book Review App on AWS | *Next.js, Node.js, RDS MySQL, ALB, Nginx, CloudFormation*

- Built a three-tier architecture (public ALB $\rightarrow$ Next.js EC2 $\rightarrow$ internal ALB $\rightarrow$ Node.js $\rightarrow$ RDS Multi-AZ) across 6 subnets in 2 AZs; automated full stack provisioning with **AWS CloudFormation**.

Containerized Microservices with Docker & Kubernetes | *Docker, Docker Compose, Kubernetes, HPA*

- Containerized a three-service app (frontend, backend, DB) with Docker Compose; deployed to Kubernetes with 3-replica Deployments, **PersistentVolume/PVC** for DB storage, and **HPA** (min 2 / max 5 pods at 70% CPU).

Experience

Full Stack Web Developer

Vexed Solutions (Internship)

Jun 2025 – Aug 2025

Multan, Punjab, Pakistan · On-site

- Built and deployed MERN Stack applications; contributed to REST API design, CI/CD pipeline configuration, and responsive frontend development.

DevOps & Cloud Engineer

FAST-NUCES (Academic Projects)

2022 – 2026

Faisalabad, Pakistan

- Completed end-to-end projects across AWS security, three-tier deployments, Terraform IaC, Jenkins CI/CD, and Kubernetes orchestration; all validated in dedicated Cloud Computing and DevOps coursework.
