Professional Summary

Full Stack Developer and Software Engineering graduate (FAST-NUCES, 2026) who ships across **web and mobile** - **MERN** and **Next.js** applications alongside cross-platform **React Native (Expo)** and **Flutter** apps on **Firebase** - including work delivered to a paying UK client. Comfortable across the full Software Development Life Cycle (SDLC): RESTful API design, real-time systems, authentication, and CI/CD.

Technical Skills

Web (MERN & Next.js): React.js, Next.js, Node.js, Express.js, MongoDB, Mongoose, RESTful APIs (REST), JSON Web Token (JWT) Authentication, Socket.io, Passport.js, TypeScript, Vite, Tailwind CSS, Axios, React Hooks, Context API

Mobile (Cross-Platform): React Native, Expo, Expo Router, React Navigation, Zustand, Reanimated, Flutter, Dart, Firebase (Firestore, Authentication, Cloud Functions, Hosting), Riverpod, GoRouter, Stripe, Google Sign-In

Backend & Data: PostgreSQL, MySQL, SQLite, Redis, Microservices, Multi-Tenant Architecture, Swagger UI, pdfkit, json2csv

DevOps & Testing: Docker, Kubernetes, GitHub Actions, AWS (EC2, S3, RDS), CI/CD (Continuous Integration/Continuous Deployment), SonarQube, Jest, Supertest, Vitest

Languages: JavaScript, TypeScript, Dart, Python, SQL

Education

FAST National University of Computer and Emerging Sciences (NUCES)

2022 - Jun 2026

Bachelor of Science in Software Engineering

Faisalabad, Pakistan

Punjab Group of Colleges

2019 - 2021

Pre-Engineering (FSc)

Punjab, Pakistan

Projects

AgriConnect - Agricultural Marketplace | *MERN, MySQL, Redis, Docker, Passport.js, Swagger, Jest* live | code

- Architected a **microservices** system (auth + main services) with Google OAuth, **Redis-backed sessions with TTL**, JWT refresh, and Swagger docs, both Dockerized. Built a **hybrid MongoDB/MySQL** layer with compound indexes behind one Mongoose-compatible interface, covered by Jest and Supertest.

SkillSwap - Freelancer Marketplace | *MERN, Express 5, Socket.io, pdfkit, json2csv* code

- Delivered an Upwork-style marketplace with bid and counter-offer negotiation, full contract lifecycle, a **7-model Mongoose schema**, and **Socket.io room-based messaging** scoped per project. Streamed **PDF and CSV exports** straight to the HTTP response, removing disk I/O and memory buffering under concurrent requests.

SoulNest - Grief Support Companion App | *Flutter, Dart, Firebase, Firestore, Cloud Functions* live | code

- Built and shipped a **cross-platform Flutter** companion app on **Firebase** for people navigating grief: private journaling, a community prayer wall, shared candle-lighting, scripture reflection, guided meditations, and a companion matching system, with **Firestore** real-time sync and **Cloud Functions** for background triggers.

Emotion-Detection Training Simulator | *React Native, Expo, Expo Router, Firebase, Zustand, TypeScript* live | code

- Built a **cross-platform React Native (Expo)** app where users converse with an AI while it analyses their emotion in real time: **Expo Router** tab navigation across five screens, a five-service pipeline (Hume AI emotion, Whisper STT, GPT dialogue, ElevenLabs TTS, **Firebase** persistence), **Zustand** state, and Sentry monitoring.

B2B Research & Outreach Agent | *Next.js, Node.js, Express, SQLite, JWT* live | code

- Designed a **multi-tenant Next.js SaaS** where **tenant scoping** is derived from the **JWT** and enforced at the **repository layer**, so no route can leak across tenants, guarded by an **automated cross-tenant isolation test suite**, with a six-stage processing pipeline gated on human approval.

Work Experience

Freelance Full-Stack Developer

Jul 2025 - Oct 2025

Independent Contractor – UK & international clients

Remote

- Delivered a production AI Voice Call Center Platform to a paying UK client – a 12-page React/Vite dashboard with protected routes, three subscriber tiers, Stripe billing, and CRM sync.
- Shipped two cross-platform mobile apps for international clients (see Projects) – the SoulNest Flutter/Firebase companion app and a React Native emotion-detection simulator – owning both end-to-end.

Full Stack Web Developer

Jun 2025 - Aug 2025

Vexed Solutions (Internship)

Multan, Punjab, Pakistan · On-site

- Developed and deployed full-stack MERN applications; designed REST endpoints, configured CI/CD pipelines, integrated responsive React frontends, and participated in code reviews following the team Git workflow.
