Summary

Software Engineering graduate (FAST-NUCES, 2026) specializing in the **MERN stack**; shipped four production applications across real-time systems, microservices, and multi-tenant SaaS, including one running live for a paying UK client. Fluent across the Software Development Life Cycle (SDLC), RESTful APIs, JWT auth, Docker, Redis, and CI/CD pipelines.

Technical Skills

MERN Stack: React.js, Node.js, Express.js, MongoDB, Mongoose, Socket.io, RESTful APIs (REST), JSON Web Token (JWT) Authentication, Multer, bcrypt, pdfkit

Frontend: React Hooks, Context API, Next.js, Vite, TypeScript, Tailwind CSS, Axios, framer-motion, Responsive Design

Backend & DevOps: PostgreSQL, Supabase, MySQL, Redis, Multi-Tenant Architecture, Docker, GitHub Actions, AWS (EC2, S3, Lambda), CI/CD (Continuous Integration/Continuous Deployment), Swagger UI, Jest, Supertest

Languages: JavaScript, TypeScript, Python, C++, SQL

Tools: Git, GitHub, Postman, Agile/Scrum

Education

FAST National University of Computer and Emerging Sciences (NUCES)

2022 - Jun 2026

Bachelor of Science in Software Engineering

Faisalabad, Pakistan

Punjab Group of Colleges

2019 - 2021

Pre-Engineering (FSc)

Punjab, Pakistan

Projects

B2B Research & Outreach Agent

live

Node.js, Express.js, JWT, Gemini, Chroma, Next.js

- Architected a **multi-tenant, multi-agent RAG platform** automating lead research and outreach; **JWT-derived tenant scoping enforced at the repository layer**, guarded by an automated cross-tenant isolation test suite.
- Designed the agent pipeline (Research → RAG → Drafting → Review Gate → Send → Tracking) on **Gemini embeddings with per-tenant Chroma vector namespaces**, gating every draft on human review before send.

AI Voice Call Center Platform

live

React, Vite, FastAPI, Twilio, ElevenLabs, OpenAI, Deepgram, PostgreSQL

- Shipped a production SaaS call center serving UK dental and restaurant businesses, with a **12-page React/Vite dashboard** (AuthContext-protected routes) and three subscriber account tiers.
- Engineered the real-time voice pipeline – **Twilio + Deepgram (STT) + ElevenLabs (TTS) + OpenAI (LLM)** – tuned for sub-2s conversational latency, with GoHighLevel CRM sync and Stripe billing.

AgriConnect - Agricultural Platform

github.com/Ameer3716/Agri_Connect

Node.js, Express.js, MongoDB, MySQL, Redis, Docker, Passport.js, Swagger, Jest

- Architected a **microservices** system (auth + main services) with Google OAuth, **Redis-backed sessions with TTL**, JWT refresh, and Swagger docs; Dockerized both services.
- Built a **hybrid MongoDB/MySQL** layer with compound indexes behind one Mongoose-compatible interface, covered by Jest + Supertest tests with HTML coverage reporting.

SkillSwap - Freelancer Marketplace

github.com/Ameer3716/skill_swap

Node.js, Express.js 5, MongoDB, React, Socket.io, pdfkit, json2csv

- Delivered an Upwork-style marketplace with bid/counter-offer negotiation, contract lifecycle, a **7-model Mongoose schema**, and **Socket.io room-based messaging** scoped per project.
- Implemented **PDF (pdfkit) and CSV (json2csv)** analytics exports streamed straight to the HTTP response, removing disk I/O and memory buffering under concurrent requests.

Experience

Freelance Full-Stack Developer

Jul 2025 - Oct 2025

Independent Contractor – UK & international clients

Remote

- Delivered the AI Voice Call Center Platform | *live* (see Projects) to a UK client: agentic inbound/outbound calling for dental and restaurant businesses across three subscriber tiers (Twilio, ElevenLabs, OpenAI).
- Shipped an emotion-detection simulator | *live*: users complete tasks and converse with AI while it detects and analyzes their emotions in real time (OpenAI, ElevenLabs, Hume AI, Whisper).
- Launched a real-time AI talking avatar | *live* that responds by voice or text with viseme-driven lip sync (OpenAI, ElevenLabs).
- Developed a grief-support companion app | *live* where users share grief and console one another through community chat, shared prayers, and candle-lighting (Flutter, Firebase).

Full Stack Web Developer

Jun 2025 - Aug 2025

Vered Solutions (Internship)

Multan, Punjab, Pakistan · On-site

- Developed and deployed full-stack applications with MongoDB, Express.js, React.js, and Node.js; designed REST endpoints, configured CI/CD pipelines, and integrated responsive frontends with an on-site team.
